Summary

Java Backend Developer

University-trained programming technician. I build REST APIs with Java, Spring Boot and PostgreSQL for real businesses, with online payments, bookings and multi-branch points of sale, backed by automated tests, Docker and CI/CD. Programming teacher at UTN. Open to backend roles and freelance projects.

Experience

Programming 3 and 4 Teacher — UTN — Facultad Regional Mendoza
Aug 2025 – Present

- Teach Programming 3 and 4: backend development with Spring Boot and FastAPI, JPA/Hibernate, SQL with PostgreSQL and REST APIs.
- Teach HTTP fundamentals and REST API design; code reviews, debugging, testing and Git.

Programming 2 and 3 Tutor — UTN — Facultad Regional San Nicolás (remote)
Aug 2025 – Present

- Guide students through backend development with Spring Boot and FastAPI, and HTTP and REST API fundamentals.

Freelance Backend Developer — Self-employed
Mar 2025 – Jul 2026

- **Don Inodoros POS** (Jun 2026 – Jul 2026): point-of-sale backend for a distributor with two branches. Sales in a single transaction, per-branch stock, bulk pricing, bundles and till reconciliation; real-time low-stock alerts over WebSocket; roles isolated by branch; integration tests with MockMvc and Flyway migrations. In its first 2 months in production it processed 115+ sales and 660+ stock movements over a catalog of nearly 700 products.
- **BurGame** (Feb 2026 – Apr 2026): online booking API for a gaming venue with 25 machines and services, JWT authentication, availability checks with no double bookings and Mercado Pago deposits confirmed by webhook. Deployed on Linux with Docker and Caddy, CI/CD with GitHub Actions and 63 automated tests.
- **Pasta Fiorella** (Mar 2025 – Aug 2025): layered REST API (Spring Boot, MapStruct, PostgreSQL) for a multi-branch online ordering platform. Mercado Pago payments via webhook, distance-based shipping with OpenRouteService and a json-server mock API for the public demo.

Pre-university Course Tutor — UTN — Facultad Regional Mendoza
2024 academic year

- Helped incoming students level up on programming fundamentals.

Backend Developer (internship) — Semillero Latam
Jul 2023 – Feb 2024

- Built REST APIs for a job board and an e-commerce site with Java and Spring Boot, with JWT and Google OAuth2 authentication.
- Designed statistics and reporting algorithms for business dashboards.

Education

University Technician in Programming — Universidad Tecnológica Nacional (UTN) — Facultad Regional Mendoza
Aug 2022 – Jul 2024

Technical Skills

Backend: Java 21, Spring Boot, Spring Security, Spring Data JPA / Hibernate, Bean Validation, MapStruct, REST APIs, Microservices, JWT, OAuth2, WebSocket, Python, FastAPI

Databases: SQL, PostgreSQL, MySQL, H2, Flyway, Alembic, Hibernate Envers

Testing and quality: JUnit 5, MockMvc, Spring Security Test, TDD, Swagger / OpenAPI

Infrastructure and tools: Docker, Docker Compose, Linux, Caddy, CI/CD, GitHub Actions, Git, Gradle

Integrations: Mercado Pago, Webhooks, Cloudinary, OpenRouteService, SMTP

Methodologies: Scrum, Agile, Code review

Certifications

React and Spring Boot: Build your first Full Stack App
Introduction to Web Development II (40h)

Languages

Spanish: Native

English: Basic (A2)
